Lumivue Product Range Brief

Lumivue Display Systems supplies three families of interactive display hardware for exhibitions, retail, museums and corporate showrooms. Every system is configured against a real space; the catalogue documents 30 representative configurations.

Holographic Display Cases

A holographic display case projects a bright, floating 3D image above a physical object inside a glass pyramid or cabinet. Lumivue builds 180 deg, 270 deg and 360 deg pyramid hologram displays, holographic tower kiosks and X-frame cabinets for museums, product launches, luxury retail and exhibition halls.

Configurations	14 documented models
Size examples	55 inch, 70 inch, 75 inch, 32 inch, 49 inch, 65 inch
Typical venues	Museum artefact interpretation and replica display, Luxury watches, jewellery and collectibles

- Included as standard: display panel, cabinet or rail assembly, media player, glass or cover, mounting hardware and a content template.
- Configurable: diagonal, cabinet finish, glass treatment, touch, motion and control, playback and destination voltage.

Interactive Sliding Rail Screens

An interactive sliding rail screen moves a display along a horizontal track and triggers content by position. Lumivue supplies motorised sliding display systems, sliding touch screen walls, timeline walls and linked multi-screen rails for corporate showrooms, museums and property galleries.

Configurations	5 documented models
Size examples	43 inch, 55 inch, 65 inch
Typical venues	Museum and corporate timeline walls, Product comparison walls in showrooms

- Included as standard: display panel, cabinet or rail assembly, media player, glass or cover, mounting hardware and a content template.
- Configurable: diagonal, cabinet finish, glass treatment, touch, motion and control, playback and destination voltage.

Transparent LCD Showcases

A transparent LCD showcase places a see-through display panel in front of a physical product, so digital content and the real object share the same view. Lumivue builds 43" and 55" transparent display cases, 4K transparent video cabinets and touch-enabled transparent showcases for retail and exhibitions.

Configurations	11 documented models
Size examples	43 inch, 55 inch, 65 inch
Typical venues	Luxury retail, jewellery and watch displays, Museum cases with layered interpretation

- Included as standard: display panel, cabinet or rail assembly, media player, glass or cover, mounting hardware and a content template.
- Configurable: diagonal, cabinet finish, glass treatment, touch, motion and control, playback

and destination voltage.

From floor plan to a configuration list

Send the venue type, available wall or floor dimensions, a photo of the space and the object the display must show. We reply with the suitable family, an indicative specification and the questions needed for a layout drawing.
